
Objective

An upper management position, where I can leverage my detailed business information systems skills as well as my comprehensive international management experience to the advantage of an institution implementing or utilizing an advanced communications infrastructure or enterprise resource planning software package.

Summary

Successful manager with proven track record of high-return information technology implementations and facility design projects.

Easy-to-integrate team player with demonstrated combination of visionary thinking and attention to details.

Permanent business driver, who always acts on opportunities of improvement.

- Over 14 years of multi-national business experience in:
 - Venture management
 - Financial management and banking
 - Information technology implementations
 - Quality assurance
- Well-exposed to private corporations from Silicon Valley start-ups to worldwide leaders with positions held in finance, software development, and consulting.
- Additional work experience in the military and public sectors.

Foreign language knowledge in English, German, Spanish, French, Russian.

Outstanding academic record with BA/BS and MBA degrees in Economic Sciences, Political Economy, and Business Administration. Studied at 4 universities in 3 countries in only 4 years, in part with academic performance-based scholarships from the European Union and from German and U.S. states.

Experience (current)

City of Milpitas, Milpitas, California, U.S.A.
Information Services Department

Since 12/1999

Telecommunications Manager (Since 07/2001)

Responsible for design, implementation, operation and maintenance of all voice, video, data and security communications systems.

- Design and implementation of a Cisco Systems-acclaimed high-performance optical, wired and wireless data network at a new state-of-the-art civic center. (See [Cisco Systems iQ Magazine, Q2/2004](#).) It was 80% cheaper to purchase and implement than the originally proposed solution and delivers more than 10 times the throughput with many additional features.
- Continuous expansion of the metropolitan area optic fiber network infrastructure. All core sites and most remote sites have been connected with full path redundancy.
- Comprehensive data center networking upgrades, including full path and equipment redundancy using optic fiber links. Implementation of new ISP connectivity, VPN and firewall security, and remote video-conferencing.
- Exhaustive cost analysis and implementation of detailed reporting facilities for the switched and wireless telephone infrastructure. Immediate cost savings in excess of 60% realized.
- Test and acceptance of many innovative solutions, such as video surveillance and public safety mobile networking. Ensured operational status of Emergency Operations Centers.

Network Manager (12/1999-07/2001)

Responsible for operation and maintenance of all data communications systems.

- Consolidation, upgrade and maintenance of the original electronic mail server infrastructure using Microsoft best practices.
- Standardization of the entire equipment and wiring specifications throughout all sites, resulting in great cost and administration time savings. Centralization of all server systems in a single data center.
- Orchestrated no-downtime moves of all data communications to and from the temporary civic center site.
- Implemented first organization-wide anti-virus security solution on over 600 workstations and servers.
